WKMS Test Case Register

Evidence updated 25 October 2026 | WKMS subsystem | PR #53 / DDP-79

Evidence register overview

30 selected WKMS requirement-mapped checks. 'PASS (local suite)' is based on shared Jest output; 'PASS (manual observed)' is from local Socket.IO terminal results; 'PASS (CI observed)' is from the PR-head GitHub workflow. A passing named suite is not an archived per-case run.

Case	Requirement	Test case / description	Evidence status
WK-001	WM-01	Worker task queue access	PASS (local suite)
WK-002	WM-01	Unauthenticated queue blocked	PASS (local suite)
WK-003	WM-02	Task detail ownership	PASS (local suite)
WK-004	WM-03	Claim task using JWT identity	PASS (local suite)
WK-005	WM-03	Duplicate claim prevented	PASS (local suite)
WK-006	WM-04	Realtime claim after persistence	PASS (local suite)
WK-007	WM-05	Active task limit	PASS (local suite)
WK-008	WM-06	Start owned task	PASS (local suite)
WK-009	WM-06	Complete owned task	PASS (local suite)
WK-010	WM-07	Escalation emits after DB update	PASS (local suite)
WK-011	WM-07	No escalation after failed DB write	PASS (local suite)
WK-012	WM-11	Checkout triggers cleaning task	PASS (local suite)
WK-013	WM-11	Duplicate checkout event	PASS (local suite)
WK-014	WM-01c	Kitchen ready triggers delivery	PASS (local suite)
WK-015	WM-01c	Kitchen duplicate ready event	PASS (local suite)
WK-016	WM-01b	Active worker authenticated socket	PASS (local suite)
WK-017	WM-01b	Reject invalid/non-WORKER JWT	PASS (local suite)
WK-018	WM-01b	Disconnect on expiry	PASS (local suite)
WK-019	WM-01b	Minimal event payloads	PASS (local suite)
WK-020	WM-01b	Socket unavailable / throws	PASS (local suite)
WK-021	WM-01b	Frontend refresh on event	PASS (local suite)
WK-022	WM-01b	Frontend reconnection cleanup	PASS (local suite)
WK-023	WM-01b	Frontend socket auth config	PASS (local suite)
WK-024	WM-01b	Live invalid JWT connection	PASS (manual observed)
WK-025	WM-01b	Live valid worker Socket.IO connection	PASS (manual observed)
WK-026	WM-07b	Front Desk alert display	NOT TESTED
WK-027	WM-P01/02	Offline PWA sync	NOT TESTED
WK-028	NFR	Controlled load / realtime latency	NOT TESTED

Case	Requirement	Test case / description	Evidence status
WK-029	WM-01b	Live task-created/claimed/escalated delivery to connected browser	NOT TESTED
WK-030	DDP-79	PR-head GitHub Actions WKMS CI	PASS (CI observed)

Boundaries of evaluation

WK-025 verifies an authenticated worker connection only, not a real task notification. WK-029 is intentionally NOT TESTED. Production performance, offline PWA behavior, and downstream Front Desk alerts are not claimed as verified. See editable CSV for inputs, expectations and exact evidence sources.
